

Maintenance

GUIDE BY MATERIALS

Ribbon

Ribbon

Uniqueness and Functionality

The ribbon we use in our products brings a handcrafted and timeless beauty to each lamp.

Known for its **softness** and **flexibility**, it allows for the creation of shapes and designs that are both **unique** and **functional**.

Cleaning & Care

Cleaning should be done without direct exposure to sunlight.

Use a dry microfiber cloth, do not use abrasive sponges, steel brushes, or high-pressure cleaners.

Ensure that surfaces are completely dry before applying cleaning products.

Always clean other parts of the lamp before the ribbon.

OTHER UNSPECIFIED MATERIALS

The maintenance of other materials used by Bover, not specified previously in this document, consists of periodically cleaning with water and neutral soap.

RECYCLABILITY TABLE BY MATERIALS

| | Recyclable | Recycled | Type of Lamp |
|---|---|---------------|---|
| METALS | x | | Platet & Frames |
